What this standard covers

This standard specifies the working procedures for the assessment of direct economic loss of earthquakes by means of remote sensing, the division and determination of remote sensing assessment zones, basic data collection, building area statistics, building losses and direct economic loss estimates and outcome outputs. This standard is applicable to the rapid assessment of direct economic losses in earthquake-stricken areas by means of remote sensing.

Document data

International classification (ICS): 91.120.25.

Chinese classification (CCS): P15.

Estimated length of the Chinese original: 15,176 words.
