1 Foreword

DB/T 83-2020 was issued by China Earthquake Administration on 30 March 2020 and has been in force since 1 July 2020.

The DB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 16 pages in English translation.

2 Scope Preview

This standard specifies the content, methods, procedures, and recording and evaluation of test results for active fault database testing. This standard is applicable to the detection of databases such as active fault mapping, urban active fault detection and fault activity identification.

DB/T 83-2020 falls under ICS 91.120.25, in the field of construction materials and building.

This catalogue holds 94 other DB/T standards in that field.

In this catalogue, DB/T standards carry edition years from 2000 to 2026.

3 About this standard

Issued by: China Earthquake Administration

English translation: about 16 pages

Chinese original: about 20,242 characters

4 Related standards

Standards on related subjects:

GB/T 17742-2020 - The Chinese seismic intensity scale

DB/T 60-2015 - Specification for the construction of seismic stations - Stations for rapid reporting of seismic intensity and earthquake early warning

DB/T 90-2022 - Verification Regulations for Invar Leveling Staff

DB/T 89-2022 - Seismic Network Operation Specifications Strong Motion Observation

DB/T 88-2022 - Seismic Network Operation Specifications Earth Tilt and Earth Strain Observation

5 Classification and status

International classification (ICS): 91.120.25

Chinese Standard Classification (CCS): P 15

Prefix DB/T: recommended standard.
