1 Foreword

DB/T 91-2022 was issued by China Earthquake Administration on 29 December 2022 and has been in force since 1 May 2023.

The DB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 28 pages in English translation.

2 Scope Preview

This document specifies the test items, test conditions, test methods and test report content of DC georesistivity meters among seismic observation instruments. Require. This document is applicable to the development, production, finalization, network connection, inspection and quality monitoring of DC georesistivity instrument for earthquake monitoring. Governor. Other similar equipment can refer to implementation.

DB/T 91-2022 falls under ICS 91.120.25, in the field of construction materials and building.

This catalogue holds 94 other DB/T standards in that field.

In this catalogue, DB/T standards carry edition years from 2000 to 2026.

3 About this standard

Issued by: China Earthquake Administration

English translation: about 28 pages

Chinese original: about 32,354 characters

4 Related standards

Standards on related subjects:

GB/T 17742-2020 - The Chinese seismic intensity scale

DB/T 60-2015 - Specification for the construction of seismic stations - Stations for rapid reporting of seismic intensity and earthquake early warning

DB/T 96-2024 - Report writing specifications for the field verification of observed seismic anomaly - Seismometry

DB/T 95-2024 - Report writing specifications for the field verification of observed seismic anomaly - Geomagnetism

DB/T 94-2024 - Report writing specifications for the field verification of observed seismic anomaly - Geoelectricity

5 Classification and status

International classification (ICS): 91.120.25

Chinese Standard Classification (CCS): P 15

Prefix DB/T: recommended standard.
