What this standard covers

This standard is applicable to the construction of power station boiler units with a rated steam pressure of 9.8MPa and above. The construction of domestic waste incineration boilers and gas-steam combined cycle power station waste heat boilers shall be implemented in accordance with Appendix A and Appendix B of this standard. The construction of imported units shall be carried out in accordance with the provisions of the contract. If there is no clear provision in the contract, this standard shall be implemented.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): P61.

Estimated length of the Chinese original: 190,165 words.

Supersedes the earlier edition DL 5190.2-2012.
