What this standard covers

This standard specifies the product principle, classification and specifications, technical requirements, test methods, inspection rules, and requirements for marking, manual, packaging, transportation and storage of capacitive seam gauges. This standard applies to non-buried capacitive seam gauges used to measure the displacement between seams on the surface of dams and geotechnical engineering safety monitoring.

Document data

International classification (ICS): 27.120.20.

Chinese classification (CCS): N74.

Estimated length of the Chinese original: 11,161 words.

Supersedes the earlier edition DL/T 1018-2006.
