What this standard covers

This standard specifies the components, technical requirements, performance indicators, testing and data of the full range of training hydropower simulators. The contents of this standard, which are covered by other types of hydrographic simulators, shall be carried out in accordance with the corresponding requirements of this standard. This standard applies to the hydroelectric power plant, pumped storage power station as the simulation object of the simulation machine.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F07.

Estimated length of the Chinese original: 29,217 words.

Supersedes the earlier edition DL/T 1024-2006.
