What this standard covers

This standard specifies the main performance of the evaporative cooling water turbine generator/generator motor, evaporative cooling system, evaporative cooling system monitoring, factory and field tests, trial operation, and warranty period. This standard applies to three-phase salient pole vertical synchronous generators/generator motors with evaporative cooling on the stator windings directly connected to the water turbine/water pump turbine.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): K52.

Estimated length of the Chinese original: 13,146 words.

Supersedes the earlier edition DL/T 1067-2007.
