What this standard covers

This standard specifies the repair requirements, methods, techniques, and post-repair acceptance after damage of the lead (ground) line during the operation of overhead transmission lines. This standard is applicable to the repairing of the concentric and twisted guide wires of the round and profile lines used in AC/DC overhead transmission lines. This standard does not apply to gap-type wire and expansion of the wire repair.

Document data

International classification (ICS): 29.240.20.

Chinese classification (CCS): F23.

Estimated length of the Chinese original: 22,271 words.

Supersedes the earlier edition DL/T 1069-2007.
