What this standard covers

This standard specifies the work content of the chemical system commissioning of the thermal power generating unit, and puts forward the requirements for the chemical testing and supervision of the commissioning stage of the unit. This standard is applicable to new or expanded thermal power generating units with a single unit capacity of 300MW and above. Other types of units can be referenced for implementation.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F20.

Estimated length of the Chinese original: 39,318 words.

Supersedes the earlier edition DL/T 1076-2007.
