What this standard covers

This standard specifies the electromagnetic environment parameter limits of ± 800 kV UHV DC transmission lines in normal operation, including the limits of ground composite field strength, DC magnetic field, ion current density, radio interference, audible noise, etc. This standard applies to ± 800 kV UHV DC overhead lines, and DC overhead lines of other voltage levels can be implemented by reference.

Document data

International classification (ICS): 33.100.

Chinese classification (CCS): F20.

Estimated length of the Chinese original: 5,554 words.

Supersedes the earlier edition DL/T 1088-2008.
