What this standard covers

This standard specifies the model name and product classification, typical structure and composition equipment, main function and performance requirements, access requirements, main component requirements, test requirements and other related content of chain static synchronous compensator (hereinafter referred to as chain STATCOM). This standard is applicable to chained STATCOMs with voltage levels of 6kV and above in power generation, transmission, distribution and power consumption systems, and chained STATCOMs with other voltage levels can be implemented by reference.

Document data

International classification (ICS): 29.020.

Chinese classification (CCS): K93.

Estimated length of the Chinese original: 30,386 words.

Supersedes the earlier edition DL/T 1215.1-2013.
