What this standard covers

This standard specifies the product classification, typical wiring, operating conditions, technical requirements, test and inspection rules of low-voltage static reactive power generating devices (referred to as devices). This standard applies to static var generators with a rated voltage of 1kV and below.

Document data

International classification (ICS): 29.240.99.

Chinese classification (CCS): F20.

Estimated length of the Chinese original: 31,375 words.

Supersedes the earlier edition DL/T 1216-2013.
