What this standard covers

This standard specifies the 300MW subcritical circulating fluidized bed drum boiler (rated evaporation of 900t/h ~ 1200t/h) and the main auxiliary equipment start, run, stop, maintenance, boiler test, accident analysis and treatment Principles and so on. This standard is applicable to circulating fluidized bed boilers of 300MW subcritical natural circulation. Other capacity levels of circulating fluidized bed boilers can be used with reference.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F24.

Estimated length of the Chinese original: 64,627 words.
