What this standard covers

This standard specifies the communication requirements and the requirements for marking, packaging, transportation and storage of synchronous phasor measurement devices in the standard substations using the DL/T 860 "Substation Communication Networks and Systems" (all parts). This standard applies to the use of DL/T 860 standard substation synchronous phasor measurement device, as product design, manufacturing, testing and application basis.

Document data

International classification (ICS): 29.240.01.

Chinese classification (CCS): F21.

Estimated length of the Chinese original: 11,183 words.
