What this standard covers

This standard specifies the communication technology principles and requirements of intelligent high-voltage equipment, covering intelligent high-voltage equipment measurement, monitoring, control and other information modeling and communication services. This standard applies to 110 (66) kV and above the voltage level of intelligent high-pressure equipment.

Document data

International classification (ICS): 29.240.10.

Chinese classification (CCS): K44.

Estimated length of the Chinese original: 50,551 words.
