What this standard covers

This standard specifies the basic requirements and diagnostic procedures, contents and methods of energy-saving diagnosis for coal-fired units of thermal power plants. This standard is applicable to coal-fired generating units of 125MW grade and above (except circulating fluidized bed units), other capacity class coal-fired units and circulating fluidized bed units can be implemented in accordance with the standards.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F23.

Estimated length of the Chinese original: 14,134 words.
