What this standard covers

This standard specifies the method of ion chromatography for the determination of ethanolamine (ETA) concentration in water and steam samples from power plants. This standard is applicable to the determination of ETA concentration in the two-loop water vapor system of thermal power plant and nuclear power plant.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): G01.

Estimated length of the Chinese original: 8,848 words.
