What this standard covers

This standard specifies the technical requirements of single-phase static energy meter multi-rate technical indicators, mechanical properties, adapt to the environment, electrical performance, reliability and interference aspects: Exterior structure display requirements, dimensions, materials and technology, and other types of requirements; functional requirements, functional configuration, display requirements and inspection rules projects. This standard applies to the power industry norms measure the reference frequency of 50Hz (or 60Hz) AC power installed single-phase static multi-rate meter (hereinafter referred to as "meter") design, manufacturing, ordering and use.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F22.

Estimated length of the Chinese original: 48,418 words.
