What this standard covers

This standard specifies the composition, technical requirements, test methods, inspection rules, marking, packaging, transportation and storage of the ice-covered monitoring devices for the overhead lines of overhead transmission lines. This standard is applicable to the ice-covered monitoring devices of the ground wires of AC/DC overhead transmission lines of 110 (66) kV and above. Other ice monitoring devices for overhead transmission lines may refer to the implementation.

Document data

International classification (ICS): 29.240.20.

Chinese classification (CCS): K47.

Estimated length of the Chinese original: 69,669 words.
