What this standard covers

This standard specifies the electrical type test, factory test and field transfer test of the voltage Sourced Converter Valves (VSC valves) for flexible HVDC transmission. This standard applies to high-voltage direct current transmission or back-to-back system of the three-phase bridge voltage source converter valve. The tests specified in this standard are intended primarily for air-insulated valves, and other types of valves may be referenced.

Document data

International classification (ICS): 29.240.01.

Chinese classification (CCS): F24.

Estimated length of the Chinese original: 31,310 words.
