What this standard covers

This standard specifies the terms and definitions, technical requirements, test methods, inspection rules, packaging, marking, transportation and storage requirements of the capacitive equipment relative dielectric loss and capacitance tester. This standard is applicable to the production, inspection, use and maintenance of capacitive equipment relative dielectric loss and capacitance tester, capacitive equipment live test instrument (hereinafter referred to as tester).

Document data

International classification (ICS): 29.020.

Chinese classification (CCS): F24.

Estimated length of the Chinese original: 12,175 words.
