What this standard covers

This standard stipulates the method and principle of measuring the water flow in the stator cooling water system of the generator stator by using the ultrasonic flow meter during the handover and overhaul. This standard is applicable to various types of generators with stator winding internal cooling.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): K52.

Estimated length of the Chinese original: 10,167 words.
