What this standard covers

This standard specifies the electronic transformer in the field transfer acceptance in the acceptance test, data acceptance, equipment acceptance and acceptance of the site acceptance and so on. This standard applies to the exchange of 1000kV and below the voltage level of substations and power plants in the new installation, modified electronic transformers. The electronic transformers mentioned in this standard include the sensor (electrical measurement and acquisition) and the merging unit.

Document data

International classification (ICS): 29.180.

Chinese classification (CCS): K41.

Estimated length of the Chinese original: 14,179 words.
