What this standard covers

This standard specifies the evaluation of soil corrosivity single index, multi-index evaluation and soil corrosion test evaluation method. This standard is applicable to the evaluation of soil corrosivity of AC steel grounding gates in power plants and substations in power systems. The soil corrosiveness of other buried metals can be evaluated with reference to the implementation.

Document data

International classification (ICS): 29.240.

Chinese classification (CCS): F24.

Estimated length of the Chinese original: 25,234 words.
