What this standard covers

This standard specifies the working conditions, technical specifications, test items, test methods, communication data format and installation and application of distributed optical fiber temperature measurement system (hereinafter referred to as optical fiber temperature measurement system) of power cable. This standard applies to the installation of single-core power cable on the optical fiber temperature measurement system, other applications can refer to the implementation of this standard.

Document data

International classification (ICS): 29.060.01.

Chinese classification (CCS): K13.

Estimated length of the Chinese original: 17,132 words.
