What this standard covers

This standard stipulates the test method, test wiring and conditions that should be met in the field when the DC equipment does not dismantle the high voltage lead test. This standard applies to the high voltage direct current transmission station in the power system converter transformer, reactor, wall bushing, capacitors, DC voltage divider, circuit breakers, surge arresters and other DC equipment does not remove high voltage lead test.

Document data

International classification (ICS): 29.200.

Chinese classification (CCS): N29.

Estimated length of the Chinese original: 36,380 words.
