What this standard covers

This standard specifies the general test requirements and test procedures for the accelerated electrolytic corrosion test method for metal fittings for disc-shaped suspended porcelain or glass insulators (hereinafter referred to as "insulators") for DC systems. This standard is applicable to accelerated electrolytic corrosion test of metal suspension accessories for disc type suspended insulators in DC systems.

Document data

International classification (ICS): 29.080.10.

Chinese classification (CCS): K48.

Estimated length of the Chinese original: 16,122 words.
