What this standard covers

This standard specifies the technical requirements, testing and test methods, packaging, transportation and storage requirements for high-voltage DC grounding feed components. This standard applies to carbon steel, high-silicon cast iron, and high-silicon ferrochrome for high-voltage DC grounding power feeding components.

Document data

International classification (ICS): 29.050.

Chinese classification (CCS): H62.

Estimated length of the Chinese original: 14,175 words.
