What this standard covers

This standard specifies the state information classification, state evaluation classification, basic condition evaluation requirements, state quantity quantitative standards, components and overall evaluation methods for sulphur hexafluoride high-voltage circuit breakers in operation. This standard applies to high-voltage sulphur hexafluoride circuit breakers with a system voltage rating of 110 (66) kV to 750 kV.

Document data

International classification (ICS): 29.240.

Chinese classification (CCS): F23.

Estimated length of the Chinese original: 26,226 words.
