What this standard covers

This standard specifies the classification, technical conditions, inspection methods, construction and thermal insulation evaluation of multi-cavity ceramic composite insulation materials. This standard is applicable to multi-cavity ceramic composite insulation products for thermal equipment, pipelines and their accessories for thermal insulation in the power industry.

Document data

International classification (ICS): 27.220.

Chinese classification (CCS): Q25.

Estimated length of the Chinese original: 11,133 words.
