What this standard covers

This standard specifies the technical, equipment, data and test requirements for the auxiliary control of the digital excitation regulator of synchronous generators. This standard applies to steam turbine generator sets of 200MW and above, gas generator sets of 50MW and above and hydroelectric generating sets of 20MW and above. Generators of other capacities and types can be referred to for implementation.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): K52.

Estimated length of the Chinese original: 19,160 words.
