What this standard covers

This standard specifies the type, content and requirements of the inspection after the operation of the super (special) HVDC transmission engineering control and protection system (hereinafter referred to as the DC control protection system). This standard applies to the operation and maintenance management of super (special) high-voltage DC converter stations. This standard does not include the contents and requirements of DC control protection factory test, sub-system test and system debugging.

Document data

International classification (ICS): 29.240.

Chinese classification (CCS): K45.

Estimated length of the Chinese original: 16,194 words.
