What this standard covers

This standard stipulates the commissioning procedures and technical requirements for the commissioning of the gas turbine and combined cycle machine components of the new, expanded and reconstructed thermal power generation construction project and the complete set of commissioning and commissioning procedures. This standard applies to gas turbines of Class E and above, power stations, including gas turbines operating in single-cycle mode and combined cycle mode. The startup and commissioning of other types of gas turbine units can be carried out with reference to this standard.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F20.

Estimated length of the Chinese original: 36,328 words.
