What this standard covers

This standard specifies the interface signals between converter transformers, control cabinets/collection control cabinets, and control and protection systems of high-voltage direct current transmission systems. This standard is applicable to the converter transformers of high-voltage direct current transmission systems of degC800kV and below, but not to the connection transformers of flexible direct current transmission systems.

Document data

International classification (ICS): 29.180.

Chinese classification (CCS): K41.

Estimated length of the Chinese original: 11,169 words.
