What this standard covers

This standard specifies the principles and requirements for the configuration of excitation regulators, thyristor rectifiers, de-excitation and rotor overvoltage protection devices, excitation transformers and other ancillary equipment for the static rectification excitation system of hydro-generators. This standard is applicable to the static rectifier excitation system of hydro-generators with a single unit capacity of 10MW and above, and other capacities can be implemented by reference.

Document data

International classification (ICS): 29.160.40.

Chinese classification (CCS): K52.

Estimated length of the Chinese original: 12,170 words.
