What this standard covers

This standard specifies the particle pollution classification method for transformer oil, turbine oil, phosphate cool oil, gear oil for wind generators, and auxiliary oil for power plants. This standard is applicable to the classification of particle contamination determined by the automatic particle counter and microscope method of oil.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F20.

Estimated length of the Chinese original: 5,534 words.
