What this standard covers

This standard specifies the general technical requirements for the unified power flow controller control and protection system (hereinafter referred to as the control and protection system) and the requirements for functional composition, testing, marking, packaging, transportation and storage. This standard is applicable to the control and protection system of the unified power flow controller with the voltage level of 220kV~500kV, and other voltage levels can be implemented by reference.

Document data

International classification (ICS): 29.240.99.

Chinese classification (CCS): F21.

Estimated length of the Chinese original: 23,256 words.
