What this standard covers

This standard specifies the network composition of wireless sensor networks used in the power environment, as well as the use environment, electromagnetic compatibility requirements and electrical characteristics requirements of wireless sensor network equipment. This standard is applicable to the research and development and application of wireless sensor network equipment in the power environment of 10kV (6.6kV) and above, 500kV and below, and the wireless sensor network equipment in the power environment of 10kV (6.6kV) and below.

Document data

International classification (ICS): 29.240.

Chinese classification (CCS): F20.

Estimated length of the Chinese original: 16,170 words.
