What this standard covers

This standard specifies the overvoltage types and protection measures of DC grounding electrode lines, and specifies the principles and methods of insulation coordination for DC grounding electrode lines. This standard is applicable to the insulation coordination design of grounding pole lines in DC transmission projects of degC400kV and above, and flexible DC transmission projects can refer to this standard.

Document data

International classification (ICS): 29.080.30.

Chinese classification (CCS): K40.

Estimated length of the Chinese original: 18,194 words.
