What this standard covers

This standard specifies the procurement and manufacturing supervision, delivery acceptance, installation and performance acceptance, operation and maintenance, performance testing and evaluation, and treatment of deactivated catalysts for flue gas denitration catalysts for coal-fired power plants. This standard applies to the use and management of selective catalytic reduction (SCR) flue gas denitration catalysts in coal-fired power plants.

Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F29.

Estimated length of the Chinese original: 8,866 words.
