### What this standard covers

This standard specifies the operation adjustment of the limestone-gypsum wet flue gas desulfurization system before shutdown, and the maintenance and protection requirements during the shutdown period. This standard applies to coal-fired power plants. Other power plants adopting wet desulfurization system can refer to the implementation.

### Document data

International classification (ICS): 27.100.

Chinese classification (CCS): F29.

Estimated length of the Chinese original: 10,111 words.
