### What this standard covers

This standard specifies the energy efficiency evaluation method of the cable structure of the power distribution network wire and cable, the energy-saving evaluation method of the production process, and the comprehensive energy-saving evaluation method. This standard is applicable to the energy-saving evaluation of overhead insulated cables with a rated voltage of 35kV and below. Other power distribution network wires and cables can be used as reference.

### Document data

International classification (ICS): 29.060.01.

Chinese classification (CCS): F20.

Estimated length of the Chinese original: 15,135 words.
