What this standard covers

This standard specifies the general requirements for periodic preventive tests of capacitive electroscopes at low temperatures, appearance and size inspection, functional tests, mechanical performance tests, electrical performance tests and test reports. This standard applies to power frequency AC with an ambient temperature of -40degC~+5degC, an altitude of 5500m and below, and 10kVdegC500kV.

Document data

International classification (ICS): 29.120.01.

Chinese classification (CCS): F24.

Estimated length of the Chinese original: 14,193 words.
