What this standard covers

This standard specifies the technical requirements, test items, inspection rules, marking, packaging, transportation and storage requirements for the operating temperature monitoring device of substation equipment. This standard applies to contact temperature monitoring devices such as surface acoustic wave temperature measurement, optical fiber temperature measurement, and resistance temperature measurement. This standard does not apply to infrared temperature monitoring devices.

Document data

International classification (ICS): 29.240.01.

Chinese classification (CCS): F23.

Estimated length of the Chinese original: 14,191 words.
