What this standard covers

This standard specifies the principle, classification, specifications, technical requirements, test methods, inspection rules, signs, packaging, transportation and storage of micro-mechanical electronic inclinometers. This standard applies to micro-mechanical electronic movable and fixed inclinometers used to measure the inclination and deformation of buildings, soil or rocks in dams and other geotechnical engineering.

Document data

International classification (ICS): 29.020.

Chinese classification (CCS): K97.

Estimated length of the Chinese original: 13,160 words.
