What this standard covers

This standard specifies the calculation method for energy saving of the cascade utilization system of flue gas waste heat in thermal power plants. This standard is applicable to the energy saving design calculation of the cascade utilization system of flue gas waste heat in thermal power plants, and the performance evaluation of the system can be implemented as a reference.

Document data

International classification (ICS): 01.040.27.

Chinese classification (CCS): F20/29.

Estimated length of the Chinese original: 16,139 words.
