What this standard covers

This standard specifies the technical requirements and test methods for primary frequency regulation of hydroelectric generating units operating on the grid. This standard is applicable to hydroelectric generating units with a single unit capacity of 10MW and above or connected to a voltage level of 35kV and above, and other hydroelectric generating units can be implemented by reference.

Document data

International classification (ICS): 29.020.

Chinese classification (CCS): K00.

Estimated length of the Chinese original: 9,965 words.
