What this standard covers

This standard specifies the power system voltage and low-voltage load shedding solution fitted out in the basic technical requirements, test methods, inspection rules and the logo, packaging, transport pumping, storage requirements. This standard applies to low-voltage power system load shedding and low voltage decoupling device (the device), and as such equipment design, manufacturing, testing and operation basis.

Document data

International classification (ICS): 29.240.

Chinese classification (CCS): F20.

Estimated length of the Chinese original: 15,146 words.
