What this standard covers

This standard specifies the maintenance items, maintenance cycle, maintenance process and requirements of the thyristor converter valve (referred to as the converter valve). This standard is applicable to the overhaul work of the converter valve equipment, not applicable to the dismantling and overhaul work carried out by returning to the factory.

Document data

International classification (ICS): 29.200.

Chinese classification (CCS): F23.

Estimated length of the Chinese original: 26,277 words.

Supersedes the earlier edition DL/T 351-2010.
