What this standard covers

This standard specifies the low- cut filter device Thyristor use conditions, technical requirements, test categories, test items, test conditions, test methods, marking, packaging, transport and storage and other things. This standard applies to AC frequency 50Hz, below the nominal voltage 1kV supply and distribution system, with the composite switch switching thyristor or filtering equipment.

Document data

International classification (ICS): 29.240.01.

Chinese classification (CCS): K46.

Estimated length of the Chinese original: 15,121 words.
